

HORIZON
2020

The role of plant primary and secondary metabolism in pollination

Results

Project Information

MEPOL

Grant agreement ID: 656918

DOI

[10.3030/656918](https://doi.org/10.3030/656918) 

Project closed

EC signature date

25 March 2015

Start date

9 June 2015

End date

8 June 2017

Funded under

EXCELLENT SCIENCE - Marie Skłodowska-Curie
Actions

Total cost

€ 165 598,80

EU contribution

€ 165 598,80

Coordinated by

WAGENINGEN UNIVERSITY
 Netherlands

This project is featured in...

RESULTS PACK

Exploiting opportunities
and addressing the
challenges of biotech in
the Agri-Food sector

19 September 2017

CORDIS provides links to public deliverables and publications of HORIZON projects.

Links to deliverables and publications from FP7 projects, as well as links to some specific result types such as dataset and software, are dynamically retrieved from [OpenAIRE](#) .

Publications

Peer reviewed articles (1)

[The Sexual Advantage of Looking, Smelling, and Tasting Good: The Metabolic Network that Produces Signals for Pollinators](#)
